PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building responsive web applications using React, JavaScript, Node.js, Express, MongoDB, Python, and Django. Former U.S. Navy Electronics Technician with 12 years of experience troubleshooting complex systems, supporting secure technical infrastructure, and solving problems in high-pressure environments. Combines software development, systems thinking, technical troubleshooting, and visual design to build intuitive, accessible, and polished user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3

Front End: React, CSS Modules, Responsive Design, Flexbox, CSS Grid, Bootstrap

Back End & Data: Node.js, Express, Django, REST APIs, MongoDB

Tools & Practices: Git, GitHub, Vite, VS Code, Accessibility

YEMOS PORTFOLIO ENVIRONMENT

React • JavaScript • CSS Modules • Vite • Context API

Live: yem-os.vercel.app • GitHub: github.com/yemdevelop/yemOS

- Built and deployed an interactive OS-inspired React portfolio with reusable window management, custom applications, and shared systems for menus, dialogs, file-system interactions, search, and sound.
 - Designed a responsive, accessible interface across desktop, tablet, and mobile layouts with keyboard navigation, focus management, reduced-motion support, and adaptive interactions.
 - Created a custom visual system primarily with CSS using layered gradients, procedural textures, transparency, shadows, and themed surfaces; deployed with Vercel and maintained with Git/GitHub.
-

PROFESSIONAL EXPERIENCE

Electronics Technician / Information Systems Support
United States Navy

Dec 2008 – Nov 2020

- Maintained, diagnosed, and repaired mission-critical communications, electronics, and computer systems.
- Troubleshot complex hardware, software, connectivity, and system failures while supporting operational readiness.
- Administered user permissions, installed and configured technical equipment, and supported secure command systems.
- Maintained secure communications equipment and cryptographic material while documenting maintenance, repairs, configurations, and technical findings under strict operational procedures.

Audio Engineering Intern
Various Recording Studios

Jun 2022 – Jun 2025

- Configured microphones, signal chains, audio routing, recording systems, and professional studio equipment.
 - Troubleshot hardware, signal-flow, monitoring, and routing issues while collaborating with engineers, producers, musicians, and artists.
-

EDUCATION

Noble Desktop – Software Engineering Certificate | 2026

Borough of Manhattan Community College – A.S., Jazz & Popular Music | 2025

Thomas Edison State University – A.S., Electrical Studies | 2018

SAE Institute – Audio Technology | 2022
